COTTONSEED REVIEW - SOUTHWESTERN AREA

Movement of Cottonseed: Cottonseed movement was at about peak level this week. Continued open weather during the week permitted some sections to practically complete harvesting.

Quality of Cottonseed: The average grade of cottonseed received at Texas mills was 98.0 compared with 99.0 last week. Oklahoma seed averaged 101.0 in grade, the same as last week.

The lower average grade of Texas seed was due principally to low oil content. However, seed originating in Districts 1, 2, and 3 contained excess foreign matter. Some east and central Texas seed showed excess free fatty acid in the oil. Oklahoma seed continues to show relatively low oil content with some excess foreign matter. The excess foreign matter was highest in Districts 3, 4, and 5.

Prices of Cottonseed: Wagon lot prices of seed paid by Texas ginnerers ranged from \$58.20 per ton in District 4 to \$28.30 in District 9. Texas reported oil mill prices were generally \$55.00 per ton, basis grade (100) f.o.b. gins, except in District 4 (blacklands) where \$62.00 per ton was reported. Oklahoma average wagon lot prices ranged from \$45.00 per ton in Districts 3 and 6 to \$55.99 in District 4. Oklahoma oil mills were reported as paying \$60.00 per ton basis grade (100) f.o.b. gins.

The sampling and grading of cottonseed is under the supervision of the Production and Marketing Administration. From reports received during the period November 20 to November 29, 1945, the following data are given relative to grades and prices of cottonseed in the counties named:
